HEMACITE.

(Pat. July 10th, 1877—April 23d, 1878.)

NOTICE.

We confine our Hemacite work to INTERIORS, and fully guarantee the Knobs to stand as long as the doors.

Though moderate in cost, they are handsome, and strong as brass or bronze. They never come loose on the shank,* or lose their finish on any INTERIOR work.

Though strong, they are comparatively light, and will not rapidly wear the locks.

They are pleasant to the hand, the most tasteful and best INTERIOR trimming in the market, and cost but little more than the commonest article of their class.

We mount Hemacite with bronze, or other outside knob, when desired.

Respectfully,

DIBBLE MFG. CO.

*The heads and shanks of these knobs are united while the heads are in a semi-melted state, under a pressure of 40,000 lbs. per square inch.
